

# Mission Statement

The aim of Acorn Pre-School is to provide a safe and secure environment, which is developmentally appropriate for our pre-school children aged 2 ½ to school age.

Our focus is to ensure that children are encouraged to develop at their own pace following their likes and fascinations, ensuring that each experience promotes each child's social / emotional development, as well as physical and cognitive development.

We ensure that we provide quality care for children through a co-operative partnership between staff, parent / carers and the children. Our goal is to provide the foundations in which their future experiences will be based on.
